Revelation Pt. 1: The Roots Of
Life (Made In Africa, 2011). If
there is no God, why, then, am
I doin', living, fighting or
dying? You look into the eyes
of a withered, old, and dying
man, and ask him why he's

fighting. He just smiles and says, he's fighting for a reason.

And if there is no God, why, then, am I doin', living, fighting or dying? I can hear the lies, the insincere, the tired, the weary, the eternally frustrated saying, on the lips of Stephen Marley -

Revelation Part 1: The Roots Of Life (Made In Africa, 2011). When this record hit the streets, 'Revelation Pt. 1: The Roots Of Life (Made In Africa,

2011)' - Stephen Marley. "I

content EXCLUSIVE

TMZ.com LeBron has been known to grab a few games of golf in his downtime -- but he's got some real passion when it comes to a new pastime of his... vaquita watching. That's what he tells TMZ Sports in a clip from our guys hanging out at the Akron Civic Theatre... the Cavs star said he was recently looking to "relax and watch a little bit of Netflix" while at the

theater -- and caught a few vaquita moments of 'The Ocean.' "They're really cute. It's a new phenomenon in a real sense and I saw a lady get a little emotional about it," LeBron said. We asked LeBron if he would be willing to take a trip to Costa Rica to get more vaquitas on film -- and he said, "Yeah, I would. I might do that." FYI... LeBron plans to get his tix for the NBA Draft

Lottery coming up Wednesday morning... and after that, he's off to do it again.

Q: jQuery: Delete All Links Between These Tags

I have some markdown formatted HTML coming into a form and I want to clean it up a bit. I want to find and delete all links between two tags but leave those tags in tact. Currently, I have:

```
$('#myDiv p a').each(function() {
```

`$(this).replaceWith(""); });` Any help would be appreciated.
Thanks A: f678ea9f9e
